## REMARKS

The figures of births and deaths shown in this statement for week ending the 6th October, 1956 relate to 220 towns with an estimated population of 30,658 thousands. The total number of towns is 318 and their population is 41,584 thousands. Thus 69% of the total number of towns representing 74% of the total population is covered in this statement. The number of births and deaths recorded in these towns were 18,640 and 6,758 representing birth and death rates of 31.6 and 11.5 per thousand of population respectively.

(a) *States (Parts A and C).*—The data here relate to 178 towns with an estimated population of 24,651 thousands. Information about Assam Bihar Madhya Pradesh and Orissa could not be included. The total number of towns is 253 and their population is 33,500 thousands. Thus 70% of the total number of towns representing 74% of the total population is covered. The number of births

and deaths recorded in these towns were 16,361 and 5,923 representing birth rates and death rates of 34.5 and 12.5 per thousand of population respectively. The table at the end gives the position by States.

No town recorded a high death rate of 50 or over per thousand of population.

(b) *States (Part B).*—The data here relate to 42 towns with an estimated population of 6,007 thousands. The total number of towns is 65 and their population is 8,084 thousands. Thus 65% of the total number of towns representing 74% of the total population is covered. The number of births and deaths recorded in these towns were 2,279 and 835 representing birth and death rates of 19.7 and 7.2 per thousand of population respectively. No town recorded a high death rate of 50 or over per thousand of population.
